## **Appendix C.2**

Worked Example of applying the CASP to a qualitative piece of research: Students' experiences of the transition from primary to secondary school. Tobbell, J. Educational and Child Psychology, Vol 20(4), 2003

The CASP contains 10 questions designed to help think about these issues systematically:

## Section A: Are the results Valid?

1. Was there a clear statement of the aims of the research? Yes/Can't tell/No Yes. Clear Aim: To place students at the center of their world by asking about their experiences at primary and secondary school. To use the data as a basis for generating psychological models.

#### 2. Is a qualitative methodology appropriate? Yes/Can't tell/No

Yes. Qualitative method is appropriate: Semi-structured group interview. Data collected end of year 7.

3. Was the research design appropriate to address the aims of the research? Yes/Can't tell/No

Yes. Appropriate research design: Thematic analysis based on Creswell (1998). Bronfenbrenner's (1979) ecological model was applied to interpret the findings.

4. Was the recruitment strategy appropriate to the aims of the research? Yes/Can't tell/No

Partially. Recruitment strategy was appropriate but with limitations. The results were based on one class of girls from a Year 7 secondary school in the North West of England. This limits generalisability for generating psychological models.

5. Was the data collected in a way that addressed the research issue? Yes/Can't tell/No Partially. Data was collected in a way that addressed the research issue. Semi-structured group interview. Group interview has limits to placing students at the center of world compared to individual interview. Data collected end of year 7 so based on historical recall.

6. Has the relationship between researcher and participants been adequately considered? Yes/Can't tell/No

Yes. Relationship between researcher and participants is considered. The author makes reference to potential bias.

#### Section B: What are the results?

7. Have ethical issues been taken into consideration? Yes/Can't tell/No Yes. Ethical considerations are referred to in the paper.

8. Was the data analysis sufficiently rigorous? Yes/Can't tell/No Yes. Data analysis was sufficiently rigorous. Thematic analysis based on Creswell (1998). Reference made to validity and reliability to support the credibility of the research. 9. Is there a clear statement of findings? Yes/Can't tell/No Yes. Clear statement of findings reported as emergent themes: School as community, Adult or child, What makes a good teacher? The learning experience, Feelings lost.

Most participants did not see transition as a positive experience. The paper highlights the importance of relationships and discontinuities between primary and secondary school. No claims are made for generalisability.

## Section C: Will the results help locally?

10. How valuable is the research? The author makes reference to the contribution of this study a part of a larger study.

## **Appendix C.2**

Worked Example of applying criteria based on Wilkinson et al (1999) to a quantitative piece of research: The social and emotional functioning of students with an autistic spectrum disorder during the transition between primary and secondary schools. Fortuna, R. Support for Learning, Vol 29(2), May, 2014 pp. 177-191.

This checklist is organised into three sections: Method, Results and Discussion.

#### Method:

1. Design: Is the type of study clear?

Yes. The author makes clear that they were using mixed methods. They state that this research was enhanced by having both quantitative and qualitative elements. It includes a clear research timeline.

2. Population: Is the population being studied defined clearly? Yes. Three boys and two girls with a diagnosis of ASD, their parents and support staff.

 Measurement: Instruments. Are the data collection tools reliable? How do they relate to the goal of the study? The Aims of the study:

1. Does social and emotional well-being of pupils with ASD change over the transition process?

2. What are the perceptions of parents?

3. How do educational staff's perceptions compare with pupil and parents?

Data was collected from pupils, parents, Year 6 and Year 7 staff through a purposively developed Transition Questionnaire which used a Likert-scale and the Strengths and Difficulties Questionnaire. The Strengths and Difficulties Questionnaire (SDQ) Goodman (2001) is a brief behavioural screening questionnaire divided across five scales: emotional difficulties, conduct difficulties, hyperactivity, inattention, peer relationship difficulties, and pro-social behaviour. Satisfactory reliability: internal consistency Cronbach's alpha .73; retest reliability at four to six months .62. Good validity: high correlation (>.80) with Acenbach's (1991) Child Behaviour Checklist and Rutter Behaviour Questionnaire. Unclear of the reliability of the data collected from the purposively developed Transition Questionnaire

4. Procedures: Are the conditions under which the data was captured clear? Has experimenter bias been acknowledged?

No information is provided on the procedures of data collection or reference to experimenter bias. Limitations highlight that different school staff completed the questionnaires pre and post transition. 5. Power and sample size: Has information been given on sample size and how this was decided upon?

Sample size was five pupils with ASD, their parents and their teachers. The pupils were selected from a limited available pool of students locally who met the requirements of the study.

## **Results:**

1. Complications: Have any unexpected events in data collection been reported? Parents were usually more accurate than school staff in judging the socio-emotive state of their child. The author reports that the reasons for this can be multifaceted: parents have stronger, vested interest in the child, the student may be repressing their feelings at school, or school staff may be overestimating the coping ability of the student with ASD. However, parental voice can be skewed by their worries. This study found that parents were not always the most accurate in judging the difficulties their children were undergoing during transition. Staff perceptions in this research were found to be divergent from the views held by the parents and students,

## 2. Analysis: Is the simplest method of analysis used?

Yes. The process of data analysis identified a number of key themes which were outlined.

 Analysis: Graphs: Is the data visually displayed? Tables and figures. Are simple and clear figures and tables present?
 No.

4. Analysis: Causality. Is causality inferred, and if so on what evidence? Causality is not inferred; SDQ results were determined as positive or negative by comparing the change from phase 1 (pre-transition) and phase 3 (post-transition). The author reports that the pupils underwent significant changes with regard to their socioeconomic well-being during the transition process. In one case for the worse and for the other four, varying degrees of improvement.

## **Discussion:**

1. Interpretation: Do the features of the design and the analysis suggest generalisability? No. The author reports a variance in results which they report emphasizes the 'heterogeneous nature of pupils with autism'.

Yes. The author notes that this was a small study of only five pupils with ASD and the size and scope are limited in terms of ability to generalise the findings on a larger scale. Different school staff completed the questionnaires pre and post transition. Recommendations are made for further research based upon the findings.

#### **Appendix D: Letter to School**

Date: 08.06.17

Dear Head teacher,

I am sending out an open invitation to Primary schools in ...... who may have children in year six with identified Speech, Language and Communication needs to ask for your assistance with my Doctoral research at The Tavistock and Portman NHS Foundation Trust. I am a qualified Educational Psychologist with ten years' experience working for ...... Local Authority.

I am interested in the concept of 'secondary school readiness' and, in particular, the experience of pupils' with speech, language and communication needs (SLCN). The aim of the research is to elicit the views of the pupils themselves regarding their understanding of readiness and factors that they believe will support their transition to secondary school. I therefore seek to recruit participants who are in year 6 of primary school and have an Education, Health and Care Plan for SLCN.

The requirements of your school would be as follows:

To discuss this involvement with relevant parents and seek consent. To support the pupil to complete a simple visual map using photographs, images and words which they will bring to the interview with me to support the discussion. To provide a suitable room for the interview to take place. The process will involve the pupil being asked a set of open-ended questions about their personal experience. This should last for up to one hour. At the end I will debrief the pupil and offer them some additional time to talk should they require this. However, I would also request a member of staff be available directly after the interview should the pupil need to talk through the experience before returning to class.

Your support in enabling the research to be completed would be greatly appreciated. If you are happy with the requirements of school during the research process, I would be grateful if you could discuss and share the attached letter on my behalf to the parents of any pupils who meet the criteria as an open invitation for their son/daughter to be part of the study. I also include information sheets which provide further information for parents and pupils. If you or parents have any questions about the research, please do not hesitate to contact me.

Yours Faithfully

Dear Parent,

I am a qualified Educational Psychologist with ten years' experience working for ..... Local Authority and I will be conducting a research project within the county in the forthcoming weeks, which will contribute to my doctoral thesis at The Tavistock and Portman NHS Foundation Trust.

I am interested in 'secondary school readiness' and in particular, the experience of pupils who have Speech, Language and Communication Needs (SLCN). The aim of the research is to elicit the views of the pupils themselves regarding their understanding of school readiness for secondary. I am therefore seeking to recruit participants who are in year 6 of primary school and have an Education, Health and care Plan for SLCN.

If you and your son/daughter would be happy for their participation in this study, I would be grateful if you could sign the consent form attached and return this to school. I will then provide school with a simple visual aid and ask them to support your child to complete this, using photographs, images and words before I meet with them. I will arrange a date to visit the school in July to meet your son/daughter and ask them to bring their visual resource to support the discussion.

I include an information sheet for yourself and your son/daughter which provides further information. If you have any questions about the research, please do not hesitate to contact me.

Yours Faithfully

**Information Sheet** 

Title: Pupils experience of 'readiness' for secondary school having an education health and care plan for speech and language needs.

## Who is doing the research?

My name is Claire Peters. I am a practising Educational Psychologist (EP) in my fourth year of studying for the post-professional Doctorate in Educational and Child Psychology. I am carrying out this research as part of my course.

#### What is the aim of the research?

The research aims to find out about the experience of being prepared for secondary school from a year 6 perspective of pupils that have identified speech and language needs. The hope is that this will give the pupils the chance to tell their story and will provide the Local Authority with important information about each of these pupils.

### Who has given permission for this research?

The Tavistock and Portman NHS Foundation Trust have given ethical approval to carry out this research. The Local Authority Educational Psychology Service has also given permission for the research to go ahead.

### Who can take part in this research?

I am looking for pupils who are in year 6 and have an Education, Health and Care Plan for speech and language needs.

## What does participation involve?

If you and your son/daughter agree for them to take part I will need you both to sign a consent form. I will then provide school with a resource to help your child record their experiences through a visual approach. I would like them to complete this at home or school before I meet with them. I will then arrange a date for your son/daughter to meet me at school. We will talk for around an hour about their preparation for secondary school and how ready they feel for this. We will use the visual resource as an aid to this discussion. I will ask a small number of questions and allow you son/daughter to lead the conversation. I will make audio recordings of the meeting which will be transcribed for analysis and then deleted. I will also keep a reflexive diary of my experiences as a researcher to support analysis.

#### What are the possible benefits of taking part?

This research places your child as an active participant in the exploration of the transition process. It is an opportunity for them to tell their story. The concept of "readiness" will be explored in terms of what this means to them. The research will provide messages about their personal experience and the meanings that they have made about readiness for secondary school.

This is a small scale study in which I will ask 6-8 pupils to meet with me to talk about their experiences. My hope is that this information will provide a better understanding of the needs of these pupils but can be extended to other pupils with special educational needs.

#### What are the possible risks of taking part?

Pupils will be talking about their personal experiences and so this may bring with it some underlying feelings, such as feeling anxious or worried. However, the open ended nature of the questions gives them freedom in choosing what to share. I would be happy to offer a follow up session or sign post to other agencies should the need arise.

### What will happen to the findings from the research?

The findings will be typed up as part of my thesis which will be read by examiners and be available at the Tavistock and Portman library. I may also publish the research at a later date in a peer reviewed journal. You will have the option to read a summary of my findings or the full thesis once the analysis has been completed.

#### What will happen if I don't want to carry on with this research?

Participation in this research is voluntary and you and your child are free to withdraw from the research at any time without giving a reason. Any research data collected before your withdrawal may still be used, unless you request that it is destroyed.

### Will my taking part in this study be kept confidential?

Yes. All records related to your participation in this research study will be handled and stored securely on an encrypted drive using password protection. Your identity on these records will be indicated by a code rather than by your name. The data will be kept for a minimum of 5 years. Data collected during the study will be stored and used in compliance with the UK Data Protection Act (1998) and the University's Data Protection Policy.

### Are there times when my data cannot be kept confidential?

Confidentiality will be maintained unless a disclosure is made that suggests that imminent harm to self and/or others may occur. The small number of pupils (4-6) may mean that you or your child recognises some examples and experiences that have been shared in interviews. However, to protect their identity, no names or schools will be used.

### Further information and contact details

If you have any questions or concerns about any aspect of the research, please contact me:

## Would you like to take part in my study?

### Who am I?

Hello, my name is Claire Peters and I am an Educational Psychologist. This means I work with pupils and those who know them best to help make school a good experience.

## What am I doing?

I am doing a study about being ready for secondary school and I would like to talk to you about yourself and your experiences of this.

## Would you like to take part?

If you would like to take part I would need you and your parents to give permission.

### What do you need to do?

If you agree to take part I will send you a small activity to complete before we meet. I will meet with you at your school, or somewhere else if you prefer. We will talk for around an hour about how ready you feel for secondary

school and use the activity you completed to help our conversation.

## Can you change your mind and leave the study?

Yes. You can change your mind and stop talking to me whenever you like. You won't have to tell me why you want to stop.

## Will what you say be kept private?

Yes. I will record our talks on a tape recorder. This is to help me remember what people tell me. Only I will listen to these recordings. I will not use your name in anything I write about the study. This means the study will be *confidential* and *anonymous*.

Will you find out the results of the study? If you wish, I will let you know what I find out.

#### **Appendix K: Briefing and Debriefing Statements**

#### **Briefing statement:**

My name is Claire and I am interested in how ready you feel for secondary school. I asked you to complete a few pages to help us talk about this. Have you brought this with you?

I'm going to be the learner and you the teacher. I will ask a few questions to help, but want you to say anything that is important to you. There are no right or wrong answers. You can ask for questions to be repeated and its okay to say if you do not want to answer a question. You can also for a break if you feel that you need one.

I will be recording our talk so that I can listen to what you have said again. I will use what you tell me in my study but I will not be using real names so only you will know what you have said.

Should you say something that I believe could cause harm to your or someone else, I have to report this to your school. Do you understand?

Do you understand why you are here and are you still happy to participate?

Do you have any questions before we start?

#### **Debriefing statement:**

Thank you for your time today it is very important to me.

I hope you feel that I have listened to you and are happy for me to use this information.

You can change your mind about taking part and I will not use what you have shared.

If you would like to see me again to talk about anything we spoke about then you can let your parents know and I will arrange a visit to you.

My study is to find out how ready pupils feel for secondary school. I will use your and other pupil's experiences for this.

Are you happy to go back to your lesson now or would you like some time to talk to me an adult in school?

Thank you for helping me learn about you and school readiness

# **Appendix L: Outline of IPA Stages 1-7 Based on Smith, Flowers and Larkin, 2009**

#### Stage 1: Reading and Listening to the Interviews

The transcript was read several times, whilst listening simultaneously to the audio recording. Smith et al., (2009, p82) stated that at this stage, the aim was to ensure that the participant remained the central focus of the analysis.

Here is an excerpt of an interview transcript taken from Keith (Participant 1):

So that one (points to a picture of a dog) is of summer holidays (pause) unfortunately erm er like my erm dog black dog Pugsy, she looked like that (point to picture) cough and she ..she died erm. (20P1)

The brackets after the quote refer to which participant this came from and where it can be located in the original transcript. So this quote is the 20<sup>th</sup> utterance from Participant 1 (20P1).

Key to Transcript notation used in quoted extracts

... Significant pause

(pointed to visual) explanatory material added by the researcher

#### Stage 2: Initial Notes

At this stage of note-taking, the transcript was re-read and heard several times. The focus at this stage was to notice any particular emphasis on a word, change of pace or tone, and significant pauses. The transcript was formatted into a table suggested by Smith et al., (2009) which provided three columns for the three different aspects of note-taking: descriptive, linguistic and conceptual to one side (in this instance the right) of the transcript.

#### 2.1 Descriptive comments

The initial form of note taking involved comments summarising the content of what the participant had said. These were noted on the right of the text in blue. These were the first of three forms of initial notes recommended by Smith et al, (2009). For example, within Cassie's (Participant 5) transcript a descriptive comment regarding her feelings towards secondary was:

When asked what year group she will be in, she answers that she will be in year seven and then expresses distress that she is in a different class to the one she thought she was going to be in. She thought she would be in Row class. (226P5).

#### 2.2 Linguistic comments

The second form of note taking was to add comments regarding the participant's use of specific language. These were written to the right in pink. These focused on the language choice, pronoun use, tone, repetition, pauses and pace. For example, in interview, a linguistic

comment noted for Harry (Participant 6) when he was talking about his achievements in sports:

Use of noise "voom" to bring to life how fast the ball was travelling. Use of actions alongside fast pace of words to reinforce his story. Speed described as a "hundred, is this a learnt phrase – hundred miles an hour? (168P6)

#### 2.3 Conceptual comments

The third form of note-taking was to consider conceptual comments. These focused on a more interrogative level of reflection on the participant's experience. These were noted in green. These explored on a more analytical level what implicit meanings were of what the participant was saying. For example, in interview, a conceptual comment about what Alice (Participant 3) had said about her concept of friendship:

Her basis of friendship is playing tricks on them. Is this about control? Tricks are based on her knowing something they do not. Power. (74P3).

#### Stage 3: Emergent Themes Identified

During the next stage of analysis, the researcher explored the transcript for emergent themes. This involved the reduction of the data generated from the transcription and the notes into a column of emergent themes to the left of the transcript. This was in purple. Each was related and referenced to the particular statement in the transcription which articulated that theme. This process was to ensure that the themes were connected to the essence of the text (see appendix Y for an extract). As Smith et al., (2009, p92) stated, "themes are usually expressed as phrases which speak to the psychological essence of the piece and contain enough particularity to be grounded and enough abstraction to be conceptual". Therefore the emergent themes should reflect the researcher's interpretation of the participant's statements. Some of the emergent themes were taken verbatim from the initial notes and some were paraphrases. The aim was to transform them into concise psychological statements.

#### 3.1 The Hermeneutic Circle

The researcher aimed to apply the hermeneutic circle to identify emergent themes. This was described by Smith et al., (2009) as the process of interpreting the part in relation to the whole, and vice versa; honouring that which is expressed in any particular utterance, whilst holding in mind the Gestalt of the interview in its entirety. The table extract below is an example of an emergent theme referenced to excerpts and initial notes from the transcript of Keith (Participant 1). Although initial notes are not typically included alongside the key words/quote, it was felt that for some excerpts including notes added a richness to help contextualise what the participant was saying, given their speech and language needs.

Emergent Theme 10: Avoidance and humour as a coping mechanism – "I was like "ooh this is different".						
Excerpt No:	Initial Notes					
30P1.	Appears to not wish to continue this conversation. Is it upsetting or is this the extent of his conversational skills? Avoidance?					

	Mmm and erm at home I got all the Roald Dahl books.
110P1.	He affirms hesitantly that it was the dog's grave that he saw.
	Ye yes.
138P1.	Erm that, well we were blindfolded and we had to erm I didn't know where I was going
	and I was like "aaaw help, where's John" (laughs) and I eventually got to him I was like
	"ah" (laughs).
142P1.	Yeah we had to hold on to each other and sometimes I let go I was like "ooh".
148P1.	But it was good fun as well. Yeah I think I nearly hit a tree (laugh).
286P1.	But erm when you first get there it's a bit like "ooh" (laughs) like different and a bit
	hard to go somewhere.
312P1.	Mm and and when when I came back to England and to this school I was like "ooh this
	is different" (laughs) erm and I didn't know how to spell or do anything or write.
378P1.	Nervous laughter. Has not considered the movement around school. Need for concrete
	experiences.
	(Laughs) it's mm.

At stage three, looking for emergent themes, the researcher looked to see whether an emergent theme was found across the initial notes. The process involved looking at the whole and then the parts, and then from the parts, back to the whole. This process was repeated over until the emergent themes were felt to represent the researcher's understanding and interpretation of the transcript. Appendices S-X contains the emergent themes with reference to excerpts and initial notes from the transcripts for all six pupils.

#### Stage 4: Subordinate Themes Identified

The next stage involved the emergent themes drawn from a transcript being clustered into subordinate themes. The emergent themes were put into a word document and then grouped into related themes using the following four techniques, as suggested by Smith et al., (2009) for identifying subordinate themes.

#### 4.1 Abstraction

Abstraction is the technique used once a grouping of emergent themes emerges, and a concept that appears to underpin them becomes a subordinate theme. For example, in Ellie's (Participant 4) transcript the subordinate theme of "Friendships" was created to explain the phenomenon, which appeared to underpin a set of emergent themes (concept of "best" friend, concept of friendship, friendship based on need and friendship reflecting family life).

#### 4.2 Subsumption

Subsumption was used when a subordinate theme directly developed out of the title of an emergent theme. For example, the subordinate theme of "sense of power or control" came directly out of its emergent theme (Alice, Participant 3).

#### 4.3 Polarisation

Polarisation was used when emergent themes with an oppositional relationship were clustered. For example, the subordinate theme "resilience and vulnerability" in the transcript of Keith (Participant 1) included emergent themes relating to managing difficult emotions, managing success and vulnerability.

#### 4.4 Contextualisation

Contextualisation is a technique suggested by Smith et al., (2009) whereby temporal, narrative and cultural components are identified within the data analysis. This included noting and grouping occasions where particular events or processes were discussed and subsequently formed subordinate themes. For example, "Perceptions of School" for Mollie (Participant 2) included the following emergent themes: Positive experience of primary, positive experience of secondary, school as a social place, school as same, school as different, school as a physical structure, school as a place to learn and school as hard.

The researcher used all of the above techniques to generate subordinate themes (see appendix R), which Smith et al., (2009, p99) advocated for being able to push the analysis to a "higher level". The extract below is an example of a subordinate theme created within the transcript of Cassie (Participant 5) and its contributing emergent themes:

Subordinate Theme 2: Relationships (attachment)					
Emergent Theme No:	Emergent Theme Title:				
Emergent Theme 3:	Importance of names				
Emergent Theme 4:	Sense of belonging				
Emergent Theme 5:	Importance of parents				
Emergent Theme 34:	Being part of a family				
Emergent Theme 35:	Concept of friendship				

#### Stage 5: The Process Repeated for each Transcript

Each transcript was analysed on its own so that the individuality of each participants narrative would be honoured, the idiographic nature of IPA retained and novel themes would be encouraged to emerge (Smith et al., 2009). The next stage involved repetition of the first four stages for each of the other five transcripts. It was important that each was seen with a fresh lens and cross referencing and cross contamination did not occur. It was important for the researcher to be consciously aware when notes reflected comments in other transcripts, but bracketed these off during the first four stages so that each new transcript was treated as if it were the first (and only). However, it is also possible that connections occurred unconsciously and so the researcher tried to remain mindful of the potential for this to happen and to bring it to awareness wherever possible.

#### Stage 6: Superordinate Themes Identified

Once all transcripts had been analysed individually and their emergent themes identified, the next stage was to search for patterns across all the interviews. All subordinate themes from the transcripts were combined and arranged into clusters of related concepts. A superordinate theme was created from related subordinate themes which were present in 75% of the transcripts, so that it could be argued that they were representative of the group. For example, all six transcripts generated seven of the superordinate themes. In order to maintain connection with the transcripts, each superordinate theme was referenced back to its representative emergent and subordinate themes. See appendix Q for a summary of superordinate themes and data trail through the subordinate and emergent themes for all six participants.

#### Stage 7: Overarching Themes Identified

The data analysis was concluded in the final stage whereby overarching themes that best captured the connections and relationships between clusters or superordinate themes were

identified. This involved capturing the essence of the superordinate themes to conceptualise and understand the participants' experiences, whilst staying grounded in the data from the transcripts. The titles of themes were considered in terms of psychological concepts instead of general or descriptive ones, to better capture the participant's experiences at a thematic level.

This stage involved capturing the complexity of the data generated from all six interview transcripts within a few discrete concepts. A graphical representation was created to show how superordinate themes interrelated with one another to evolve into the overarching themes and how these related back to the data as referenced by extracted textual illustrations. The hermeneutic cycle of continual sense making was returned to at each stage to ensure that the themes were always reflecting the data. The researcher used a support group of peer students also working on Doctoral studies to follow the stages of analysis to ensure these were valid.

#### **Frequency of Thematic Findings**

Stage 7 yielded four overarching themes from the six transcripts. Eight of the superordinate themes derived from all six transcripts, one from five of the six transcripts. Appendix O shows the overview of Overarching themes and data trail to Superordinate, Subordinate and Emergent themes for all six participants, Appendix P shows the overview of the Overarching and Superordinate themes with examples from all participants. Appendix Q shows an overview of the Superordinate themes data trail to Subordinate and Emergent themes for all six participants.

**Re: Research Ethics Application** 

#### Title: Pupil experience of "readiness" when joining mainstream secondary school having previously attended enhanced provision for speech and language

Dear Claire,

I am pleased to inform you that subject to formal ratification by the Trust Research Ethics Committee your application has been approved. This means you can proceed with your research.

If you have any further questions or require any clarification do not hesitate to contact me.

I am copying this communication to your supervisor.

May I take this opportunity of wishing you every success with your research.

Yours sincerely,

Best regards,

Paru Jeram Secretary to the Trust Research Degrees Subcommittee T: 020 938 2699 E: pjeram@tavi-Port.nhs.uk

#### **Appendix N: Extracts from Reflective Journal**

#### Interview 1: 6<sup>th</sup> July 2017

Alice was reluctant to enter the room. I introduced myself by first name and the teacher checked Alice was allowed to call me this. This seemed to help her relax. She sat and volunteered how nervous she felt. We spent a few minutes chatting and I told her she could tell me whether she thought I had been a good learner and listener at the end. What I did notice was that her speech was much clearer than I had anticipated. The interview went well up to a point. She then began to disengage by not talking and miming. This became very hard in terms of recording her words. She also kept saying "pranked" and so it was not always clear whether what she was saying was a true account. In terms of a power imbalance, I felt that this was tilted in her favour. Saying 'pranked' suggested to me that she was not stressed by the situation and was in fact enjoying herself. The interview was concluded sooner than I would have liked. She took charge of the session wanting to run quickly though the visuals. She was heavily reliant on these and seemed really keen to share them which suggested that they were an important tool. At times, when I did not follow her or misunderstood, she laughed attributing the fault to me. She also fed back that she liked being the teacher and me the student. She said I was not a good student as I had not found out enough about her, but when I asked what more she would have liked me to know, she struggled to answer. She told me she had pranked me again and that I was a good listener. I was left emotionally drained at the end of this interview. This interview stayed with me for a long time and left me feeling humiliated and angry and I wondered if I was reflecting how Alice felt. Was this her transferring how relationships with adults make her feel? She had said she was nervous so how much did she willingly consent? Was I a tool for her to project how she was feeling? She appeared to leave feeling happy and so perhaps I was the container for these feelings. I had said I was the pupil and she the learner so perhaps she had taken this literally?

#### December 18<sup>th</sup> 2017

As I begin to do my first read of the typed script whilst I listen to the audio to add my first thoughts and notes I am struck by the lack of detail in the participants response. I seem to have done a lot of talking to get them to talk. I am worried that I don't have enough rich material from my participants to analyse them in the depth I want. What if this does not allow me to delve into the rich experiences I desire? Will this also lead to difficulties in trying to compare experiences? On the other hand this "not knowing" feels like true IPA I have no idea yet what the messages are going to be. I think that an earlier module undertaken on the course 'Therapeutic Communication with Children' has become more important than I realised. This of course will be valuable in the interpretation stage when I can draw upon Psychodynamic thinking to reflect on the unconscious processes in what they were bringing to the conversation, but just as importantly, in the process of double hermeneutics and being attuned to the complex interplay of the participants feelings and my own.

#### July 30<sup>th</sup> 2018

As I am immersed in the ongoing analysis of the transcripts, I am struck that I know these accounts so well and yet the experience is probably long forgotten by the participants. It makes me wonder what they would say about their experiences now should I speak to them again.

#### 18<sup>th</sup> October 2018

As I am now considering cross case analysis, it is of interest just how many commonalities occurred in participant's accounts. I hope it reflects my ability to treat each case as unique that I am only discovering this now, but I am aware that it could also be due to unconscious processes.

The process of organising into themes is more complex than anticipated as my stance as a researcher is to represent the unique and personal experience and not to condense rich information into quantifiable data. It is difficult as I know the accounts so well, to extract relevant information to the phenomenon and discard other information. It is only now as I organise the themes in superordinate and overarching themes that I truly understand the nature of double hermeneutics.

## **Overarching Themes (with one exemplar from each participant from the Superordinate Themes)**

#### 1. Concept of Self, Family and Life Experience

#### **Concept of Self**

Keith: Well before I came back to England (pause) I used to be in Spain. That's where I was born. 310P1 Mollie: My favourite days of the week are Friday's as looking forward to a day off and Sundays because I go to see my grandparents.48P2

Alice: ....I go horse riding with my mum. 4P3

Ellie: ... taking my dogs for a walk 4P4

#### Cassie: I can wear any shoes today 144P5

Harry: I like climbing on things and (pause). My I'm an active person who runs around and plays around and (pause).

#### World View/Personal constructs

Keith: And I got some support and (pause) erm and (pause) erm and they had like a break and I was like err I was like err (pause) a bit like afraid so I didn't know err like (whisper to self) err (whisper to self) err like it was like really different. 330P1

Mollie: .....but I got my own. 316P2.

Alice: Erm food and you can sit with other friends and don't get bullied there and this school get bullied and all that. 210P3.

Ellie: ... I got other best friends. 50P4

Cassie: We go anywhere. 102P5

Harry: ..He sometimes he plays rough, sometimes he doesn't play rough. 26P6

#### Attachment

Keith: Yeah we had to hold on to each other and sometimes I let go I was like "ooh". 142P1 Mollie: I've been in here a long time. 130P2.

Alice: They are all good friends. I got two Maisie, my mm new school, and Helen, my new school. 42P3 Ellie: Yeah and I've got three best friends which is Alice, Nadia who is in my class and Lilith who's got, who's at my old school and we're going to the same secondary school.52P4

Cassie: We go anywhere. 334P5

Harry: I made a lot of friends already. 292P6

#### 2. Risk and Resiliency and Coping tools

#### Emotional Intelligence, Vulnerability and Resilience

Keith: Err terrified. 144P1

Mollie: Yeah. I'm going to miss them. 426P2

Alice: Err a bit scared and all that. 156P3

Ellie: Yeah and I've got friends who can show me around. Tell me where the classes are because I'll get confused because it's big and there a stair with loads of classes.180P4

Cassie: Like Miss Howard in our um changing class. My mum got a letter (raised voice) to say I'm not in Row class I'm in like a different class (upset) and I need to walk, then I can stay there for a bit longer for clubs. 270P5 Harry: I was very scared (laughs). 108P6

#### **Defence Mechanisms**

Keith: Mm and and when when I came back to England and to this school I was like "ooh this is different" (laughs) erm and I didn't know how to spell or do anything or write. 312P1

Mollie: You get used to it. 392P2

Alice: Yeah Lucy always rush me and I don't like it. My mum always not rush me. 138P3

Ellie: Yes when I first came here erm Alice came up to me gave me a hug in the office cos I was crying. 96P4 Cassie: Yeah and that is all.134P5

Harry: That's iiiiiit (communicating frustration), football, basketball, tennis, erm rounders...err wait I want..., cricket, swimming that's a sport. 254P6

#### 3. Language skills and the impact on Personal Narratives

Impact of language on expressing views

Keith: Oh yeah you have to do the night before the day happens. 418P1.

Mollie: Yeah I put a year back here.132P2.

Alice: Fff a little bit nervous and fff (long Pause) err.184P3

Ellie: Ttt (long pause) ttt ITV? 46P4

Cassie: They they can move me up the next like class.234P5

Harry: (deep breath) First in year year three I couldn't read a any books, I couldn't write (pause). 106P6

#### Sharing the lived experience

Keith: But erm when you first get there it's a bit like "ooh" (laughs) like different and a bit hard to go somewhere. 286P1

Mollie: He died. And the person said "it was not the aeroplanes it was the beauty that killed the beast". 210P2 Ellie: Yeah because you have to swap classes, like English class, maths class, because that's what we did induction day and it was kind of difficult going to different classes as here you just stay in the same class for English and maths and science.224P4

Cassie: I don't know I didn't been in my new class yet.268P5

Harry: And then I was good in there, but then I went "woowoowoo" and I was a tiny bit bad in year four.

#### 4. Experiences of the Education System

School as a system

Keith: Erm it it's much much more bigger than our school but I I've seen the library and it's really cool. 168P1

Mollie: Erm I go and play (pause) it was with their gym equipment. 250P2

Alice: Erm I do erm English with Mr Pledge, erm he's a great teacher (pause) and mm (gulp) and erm tt they some Nina and Stacey in this class, my class. 102P3

Ellie: Because it's massive and you change classes. 232P4

Cassie: That that big (arms outstretched). 216P5

Harry: Yeah you have to say Sir. 276P6

#### School as a rite of passage

Keith: Yeah I've tried it on before yeah and it's like it's like really cool thing. 404P1.

Mollie: Erm ready to meet new friends.380P2

Alice: Because it's more nicer than Bowden school. 206P3

Ellie: Electricity that we had. It's a science class and we holded a (pause) a erm match, matches and put it on the thing, on the gas and it looked really cool.156P4

Cassie: Playing with my....making new friends. 334P5

Harry: I'm ready for everything except English and Humanities. 256P6

Emergen	t Theme 8: The importance of visuals
Excerpt:	Initial notes:
2P4.	Ok Erm I like taking my dogs for a walk. I like playing basketball. Erm my best
	friend is Alice. I like watching TV.
20P4.	Reliance on others or visuals. Struggles to think of things for herself.
	Yeah (pause).
50P4.	The concept of friendship is important to her. She has a number of "best" friends.
	These are not on her visual and so were forgotten at first. She wants to say more
	about herself. The importance of being known.
	Erm tt my I got other best friends.
56P4.	When asked about her current school, she refers to her visual and says that she likes
	English and playing with her friends on the playground, science, PE and writing.
	Err tt I like English. I like playing with my friends on the playground, I like
17004	science, I like PE, I like writing.
170P4.	She describes on her visual that she has friends that will be going to the same
	secondary school as her. She also describes how there are older pupils already there
	that she knows and that she will have a buddy.
	Erm I have friends that are going to Gilroy school. Err I know people that are from Gilroy school (pause) which are big because I'm having a buddy there.

172P4.	Yeah she'll be showing me round. She's called Leanne.
174P4.	Yeah she's in year 10 and she's going up to year 11 when I start.
176P4.	Yeah and she'll be helping me.
180P4.	Yeah and I've got friends who can show me around. Tell me where the classes are
	because I'll get confused because it's big and there a stair with loads of classes.
182P4.	Err Leanne and my other friends can help me as well.
198P4.	Ooh because Gilroy secondary is massive and you could get lost from the classes.
200P4.	Yes as Bowden School you can't get lost as there's no stairs and it's not massive.
222P4.	Because then they can show me around.
224P4.	Yeah because you have to swap classes, like English class, maths class, because
	that's what we did induction day and it was kind of difficult going to different classes
	as here you just stay in the same class for English and maths and science.
252P4.	When asked how she will manage the difference in her new school, she replies that
	she will ask to see what lessons she has to go to.
	Err ask; see what lessons I have to go to.
Emergen	t Theme 10: Sense of belonging

102P4.	Yeah as we didn't really have other friends then and then we met Nadia in year four.
120P4.	(Laughs) Yeah I thought everyone was starting in year 3 and Alice was tt she didn't
	have any friends either there so then we started to be best friends and we were we
	were in the same class together.
126P4.	When asked where she is going, she is able to name her secondary school with
	enthusiasms and sense of pride.
	Gilroy Secondary.
132P4.	Use of "they" she does not yet belong to that school.
	And two of my brothers went there, well one of them now kind of still going there
	but he's home schooled because they stopped their help in year 10.
152P4.	Use of "we did", she is beginning to feel part of her new school.
	We did on Friday afternoon, we did science.
Emergen	t Theme 11: Literal interpretation
Excerpt:	Initial notes:

152P4.	We did on Friday afternoon, we did science.
186P4.	My best friend Ophelia cos we're going to be in the same class cos her brother's
	gone to Gilroy as well so she'll probably know and two of my brothers have been
	there. And tt there's an English lesson class and a maths class and science class, art
	class.
188P4.	She confirms there are lots of classes and adds a music class to the list of lessons.
	Yes and a music class.
190P4.	She confirms that as well as science on the induction, she did English, maths, music
	and art. These are all the lessons she had just named.
	Yes we did English, maths um music, art.
204P4.	Um tt art as drawing it and we had a crayon.
224P4.	Yeah because you have to swap classes, like English class, maths class, because
	that's what we did induction day and it was kind of difficult going to different classes
	as here you just stay in the same class for English and maths and science.
258P4.	When asked how her current school has helped, she responds her maths, English,

	school.
104P4.	She confirms that she started at this school in year three, making it clear that it was at
	the start of year three.
	Yeah. The start of year three.
120P4.	(Laughs) Yeah I thought everyone was starting in year 3 and Alice was tt she didn't
	have any friends either there so then we started to be best friends and we were we
	were in the same class together.
130P4.	Yeah I've had an induction there for two days on Thursday and Friday I did.
134P4.	It was nice (pause) err all of my old friends were there and I got to be in the same
	tutor group as my best friend called Ophelia.
140P4.	Erm (pause) err we sat next to each other.
144P4.	Being with my old mates.
146P4.	When asked how it felt to see her old friends, she describes that it felt "weird" as she
	has not seen them "for a very long time, for four years".
	Err it felt weird because I haven't seen them for a very long time, for four years.
152P4.	Moving on. She has experienced a science lesson.
	We did on Friday afternoon, we did science.
154P4.	"Proper science at secondary. Is science "not proper" in primary? Moving on.
	Good (pause) proper science.
156P4.	Electricity that we had. It's a science class and we holded a (pause) a erm match,
	matches and put it on the thing, on the gas and it looked really cool.
162P4.	Science in secondary as something dangerous. Growing up.
	Yeah you have to wear those glasses.
166P4.	Secondary as something exciting where she has new experiences. Growing up.
	I never done that before.
170P4.	Moving on from current friends. Has friends that are going there. Having a "buddy"
	who is "big" is she little and helpless?
	Erm I have friends that are going to Gilroy school. Err I know people that are from
4.00 100 1	Gilroy school (pause) which are big because I'm having a buddy there.
174P4.	Moving on. A journey for everyone. Needing to be looked after.
	Yeah she's in year 10 and she's going up to year 11 when I start.
192P4.	Appearing ready for the change of schools. Moving on. Is this based on her
	experience?
	Alright.
206P4.	Yeah and science because normally in this school about science we talk about about
	erm ttt about smoking and drinking and normally we write that down. But in big

	school science is something that you can do like what I did.
240P4.	She feels that it is a good thing that the year 7's have their own playground. She
2101 1.	makes it clear that she is referring to year sevens.
	Yes. For year seven's.
254P4.	She feels that she is ready for the changes she will experience. Moving on.
	Yeah.
Emergen	t Theme 20: Belief in school as a good experience
Excerpt:	Initial notes:
84P4.	She confirms that playtimes are the best bit of her school day.
	Yeah.
86P4.	When asked how she finds lunchtimes at school, she responds "good" with
	confidence but does not expand on this.
	Good.
90P4.	I get to sit with my best friends.
106P4.	When asked how she feels about school now, she replies "good" with confidence.
110D4	Good.
112 <b>P</b> 4.	When asked what she would tell a visit about this school, she would describe her current school as "nice".
	Nice.
116P4.	Nice teachers.
110F4. 118P4.	Err (pause) nice pupils.
124P4.	Confirms that she has had a nice experience of her current school.
12.11 1.	Yeah.
130P4.	She talks about her induction days with confidence. Moving on?
	Yeah I've had an induction there for two days on Thursday and Friday I did.
Emergen	t Theme 21: Secondary as better – "proper science"
Excerpt:	Initial notes:
154P4.	When asked how the science lesson was, she describes it as good initially before
	adding "proper science". She seems excited about this.
	Good (pause) proper science.
156P4.	Science in secondary as "cool". Moving on. She is excited.
	Electricity that we had. It's a science class and we holded a (pause) a erm match,
206P4.	matches and put it on the thing, on the gas and it looked really cool. Yeah and science because normally in this school about science we talk about about
2001 4.	erm ttt about smoking and drinking and normally we write that down. But in big
	school science is something that you can do like what I did.
210P4.	Confirming more investigations and experiments in science would be good.
	Yes (laughs).
Emergen	t Theme 22: Secondary as different
Excerpt:	Initial notes:
198P4.	Ooh because Gilroy secondary is massive and you could get lost from the classes.
200P4.	Yes as Bowden School you can't get lost as there's no stairs and it's not massive.
204P4.	When asked if she will be doing anything different to now, she needs time to think
	about this. She describes how in art they were drawing with a crayon.
	Um tt art as drawing it and we had a crayon.
220P4.	Erm. I know people who are from Gilroy.
222P4.	Because then they can show me around.
224P4.	Yeah because you have to swap classes, like English class, maths class, because
	that's what we did induction day and it was kind of difficult going to different classes as here you just stay in the same class for English and maths and science.
230P4.	When asked what words the new school brings to mind, she said "different".
2501 4.	Erm it's different.
252P4.	When asked how she will manage the difference in her new school, she replies that
	she will ask to see what lessons she has to go to.
	Err ask, see what lessons I have to go to.

201 1.	Both.
32P4.	Concept of friendship. The importance of being together. Sense of same and
	different.
	Yeah well we go in the same taxi together. Erm we play together. Erm. We are not in
	the same class.
134P4.	Old friends, she is returning to the fold. Moving on from her current friends?
	Concept of friendship.
	It was nice (pause) err all of my old friends were there and I got to be in the same
144P4.	tutor group as my best friend called Ophelia. Old friends. Moving on from her current friends? They are her history, as with her
14414.	"old" dog.
	Being with my old mates.
Emergen	t Theme 24: Importance of having a history with others
Excerpt:	Initial notes:
134P4.	It was nice (pause) err all of my old friends were there and I got to be in the same

	Err (pause) tt err I don't know.
186P4.	Talks of her "best" friend as she will be in her class. Same experience as starting at
1001	current school. Reliance on friends close by? Her family and her friends have shared
	this experience following in their footsteps.
	My best friend Ophelia cos we're going to be in the same class cos her brother's
	gone to Gilroy as well so she'll probably know and two of my brothers have been
	there. And tt there's an English lesson class and a maths class and science class, art
Emongon	class. t Thoma 25. Importance of family, fallowing in their factotong
	t Theme 25: Importance of family, following in their footsteps Initial notes:
Excerpt: 132P4.	And two of my brothers went there, well one of them now kind of still going there
1321 4.	but he's home schooled because they stopped their help in year 10.
186P4.	My best friend Opheliacos we're going to be in the same class cos her brother's gone
	to Gilroy as well so she'll probably know and two of my brothers have been there.
	And tt there's an English lesson class and a maths class and science class, art class.

80P4.	Play football err (long pause) basketball.
140P4.	Erm (pause) err we sat next to each other.
212P4.	When asked if she thinks anything else is different between her current and new
	school, she responds "no" after giving this some thought.
	Erm ttt mm (pause) no.
234P4.	When asked what feelings these difference bring, she needs time to think about this
234P4.	

	before reiterating that she is excited.
	(pause) Feel excited.
	t Theme 27: Self Concept
Excerpt:	Initial notes:
8P4.	Dogs are an important part of her life. She knows facts about them. Staffs.
16P4.	Self as fun. Enjoying a joke. Laughs.
28P4.	Self as a sport lover.
76P4.	She enjoys PE. Tennis is a shared experience. Sense of belonging. Concept of self as sports lover.
	Err I like PE like erm tt (pause) PE I like playing PE. Sometimes we play (pause) tennis.

501 4.	about herself. Yeah.
42P4.	Lack of confidence in talking about herself. Does she usually talk about herself? Err tt tt Victorious.
44P4.	She responds with "yeah" rather than saying more to end this topic of conversation. Yeah.
46P4.	When asked if she watches anything else on television, she is hesitant and unsure and
4014.	needs time to think. She names a channel rather than something that she likes to
	watch in order to say something in response. She answers as if this is a question.
	Ttt (long pause) ttt ITV?
108P4.	Struggles to verbalise her thoughts. Is this her language skills or experience in doing
1001 1.	so? Mmm.
110P4.	She appears to be struggling for others things to say about school.
	Err ttt (pause).
114P4.	Struggles to verbalise her thoughts. Needs to base her answers on real experiences as
	with her writing.
	Err well erm tt (pause) err.
Emergen	t Theme 29: Importance of Familiarity/not knowing
Excerpt:	Initial notes:
94P4.	When asked to describe her first day here, her first response is one of feeling "scared".
	Err a bit scared.
96P4.	She confirms that she felt a bit scared on her first day and explains how she was
	crying in the office and her now best friend gave her a hug.
	Yes when I first came here erm Alice came up to me gave me a hug in the office cos
	I was crying.
106P4.	School as a positive experience. This has moved on from her first day in tears.
	Importance of familiarity.
	Good.
120P4.	Yeah I thought everyone was starting in year 3 and Alice was tt she didn't have any
	friends either there so then we started to be best friends and we were we were in the
	same class together.
160P4.	When asked if she enjoyed the science lesson, she agrees but admits to feeling "kind
	of scared" of the fire in the lesson. She follows this up with a nervous laugh.

206P1. Understanding is based on his experiences and interests. 206P1. Response to images/visuals.	206P1: There was like erm like erm science erm like dragon breath like fire.	206P1. He appears enthusiastic to continue talking about this but struggles to find the words using "like erm" to try to say what it was like. He continues to describe the science lesson describing this as like dragon's breath and like fire.	206P1. He makes another reference to "dragons" like his art work. Use of metaphor brings description to life.	206P1. He likens the Bunsen burner to "dragon breath". It has caught his imagination and his interest in dragons. He responds to images.
	207I: Ok.			
208P1. Growing up.	208P1: Erm we used those those BunBunsen boilers.	208P1. He continues to explain the science activity and is able to bring to mind the words for the equipment that he used "Bunsen Boilers".	208P1. Using the language "Bunsen boilers" to share this experience.	208P1. He wants to share his experience. He is growing up using grown up equipment.
	209I: Yes because they have a flame don't they?			
	210P1: Yeah.	210P1. Confirms that the Bunsen boiler (burner) has a flame which is why they are like dragon's breath.		
	211I: And you got to use those?			
	212P1: Yeah.	212P1. He confirms he got to use a Bunsen boiler in the science activity.		

	213I: They look a bit like a dragon's fire don't they?			
	214P1: Yeah and erm erm erm.	214P1. He struggles to think of what else to say.		
	215I: What did you use those for?			
216P1. Secondary as "better". 216P1. New experiences.	216P1: We we used those for (pause) like a stick they have like at the end of the stick they had erm some chemicals and we put it through and then they changed different colour so it was really cool.	216P1. He begins his description by using the words from the question. With this prompt he is able to continue to explain what he did in the science lesson. That they put a stick with chemicals under the flame and it changed colour. He reiterates how much he enjoyed this experience saying it was "really cool".	216P1. Uses the word "like" to describe the items. He again uses the word "cool" to describe his thoughts about this.	216P1. He is finding the secondary experience "cool". It appeals to his need for visual and concrete experiences. He likes new experiences.
	218P1: Yeah.	218P1. He confirms he did an experiment in science.		
	219I: And do you do that kind of thing here?			
	220P1: Erm well erm (pause) no.	220P1. He took time to gather his thoughts and his response is much more neutral than before. They do not do that kind of science at his current school.		220P1. The experience of science at his current school is not as good.

	221I: Have you got those burners here?			
	222P1: No.	222P1. He confirms that his current school do not have Bunsen Burners.		
	223I: So was that quite exciting?			
224P1. Secondary as better. 224P1. Moving on.	224P1: Yeah really exciting it was like it was like really cool (laugh).	224P1. He becomes excited again when the focus is back on his secondary school experience. He reiterates what a good experience the science lesson saying it was "really exciting" and "really cool" emphasising the word "really". He laughs to communicate his excitement.	224P1. He uses the word he was given "exciting" but uses "really" to emphasise this. He uses the word "cool" again to describe the experience. Use of the word "like" to describe things.	224P1. He is finding the secondary experience "cool". He is enthused when speaking about it.
	225I: So do you like science here?			
226P1. Secondary as better. 226P1. Moving on.	226P1: Mm erm well I like the science at Hay High.	226P1. Hesitant not responding to the question asked. He expresses that he likes science at his new school.	226P1. Is this a deliberate response or a misunderstanding of the term "here"?	226P1. Disregarding current school? Deflects question back to new school. Already moved on?
	227I: Do you think you'll enjoy it more there?			
	228P1: Yeah.	228P1. He responds that he thinks he will enjoy science more at his new school, but		

		does not say why.	
	229I: Yeah.		
	230P1: Yeah. 231I: That's sounds fantastic.	230P1. He has nothing further to add here.	230P1. He is able to say that he will enjoy science more at his new school, but not why. Has he thought about this?
232P1. Bring the lived experience to life.	232P1: Oh yeah and when I put the those on the (pause)	232P1. He remembers another part of the science lesson to share. He has responded to being given time to think. He acts out putting goggles on to communicate this as he does not have the words to describe them.	232P1. Actions speak louder than words. He can find ways to get his point across. Wants to be understood.
	233I: What the goggles?		
234P1. Lived experience. Understanding is based on his experiences. 234P1. Humour and actions to tell his story. Humour as	234P1: Yeah the goggles erm I erm I was like oh yeah "James Bond".	234P1. He confirms that he is talking about the safety goggles (glasses) and appears relieved that he has been understood when the word "goggles" is used. He is confident and keen to share his humour at thinking he was like James Bond.	234P1. He is finding the secondary experience a positive one. Comparing wearing safety goggles to a James Bond movie. Life through a lens Compares to a film he has seen linking real world experience to
